- All tests may not be valid for metallic and gloss laminates.
- Samples pasted, represent only color, pattern and finish and not actual thickness.
- There may be slight variation in shades in batch to batch, particularly in metallic designs.
- Bonding of laminates under high humidity, plywood with high moisture content, ply with uneven surface, inferior quality adhesive and insufficient pressure may lead to delamination/ air bubbles in between ply and laminate.

THIS IS FOR SAMPLE PURPOSE ONLY. IT IS NOT FOR SALE.

IVAS
LAMINATES

Do not use chemicals for cleaning

Extra care required in vertical pasting of laminates sheet as there is possibility of bubbles due to lack of uniform pressure

Avoid direct sunlight/ continuous light. These may cause color fading

Cracking at corners and around cuts may becaused by improper conditioning, improper bonding, and poor planning. Avoid all these to prevent cracking at corners.
