Interior

● SPECIFICATION

- Color variations are possible from dye to dye.
- Maintenance clean surface with warm soapy water and wipe clean.

● ADVANTAGES OF ZARIK EDGE BAND

- Available in a wide range of colours and patterns matched to all popular high-pressure and TFM surfaces.
- Protects the wooden panels in your furniture from moisture, thus reducing the effects of atmospheric humidity and liquid spills. This means that the strength and durability of the wood increases. So, the next time you spill coffee on your table and it drips down the edge, thank the ZARIK Edge Band for protecting cover wood.
- Edgeband Lacquered for maximum protection and gloss control.
- Lacquered for maximum protection and gloss control.
- Edgeband Conveniently packaged for maximum flexibility.
- Conveniently packaged for maximum flexibility.
- Edgeband come in varying shades and colours and can be custom-made.
- No splintering or tearing & No dirty cut edges.
- Edge Band it's hold of 4 to 5 hours to dry only.
- No use for nailing. ZARIK Edge Band nail free product, hence no damage.

04

• USES OF ZARIK EDGE BAND

100% Match with Leading Board
& EDGEBAND Manufactures

ZARIK®

PVC EDGE BAND TAPE

Strength | Effective | Graceful

ZARIK PVC EDGE BAND Essentially, an edge band is a thin strip of impermeable PVC that is cut to fit the size of a wood panel. It is then applied to the raw edge using a strong adhesive. So that they cover the wood and do not have any sharp ends. Any surplus glue is scraped off and the finished edge.

STEP-1

Measure and cut the
Edge Banding as per
the requirement.

STEP-2

Apply the contact Glue
surfaces to Edge Banding
and the material
with a brush or spray.

STEP-3

Let the contact Glue
Cement dry to touch ,and.

STEP-4

ZARIK EDGE BAND The ends are
trimmed flush and bent so that they
cover the wood and do not have
any sharp ends the extra
edges to smooth.

High-gloss & matt

On Of The Largest
Manufacturing
Plant In INDIA

• PVC EDGE BAND MANUFACTURING PLANT

ZARIK EDGE BAND excellent processing characteristics, PVC is widely used in the manufacture of edge bands for the furniture industry. Edge banding is a technique for covering the exposed sides of materials like plywood, particle board, and MDF to increase toughness and give the appearance of a solid or more valuable material. Heat tolerance, oil resistance, high hardness, abrasion resistance, and excellent bendability are all characteristics of PVC edge banding. The surface can be printed with different patterns, such as natural wood or some other wonderful design, and the surface can also be laminated or hot stamped with different patterns. The recycled PVC edge banding is environmentally friendly. It's widely used in beds, cabinets, doors, and windows, as well as office furniture etc.
