INSTALLATION

Step - 1 ▶

Prepare the Surface

Clean the wall surface. Ensure the wall is smooth and free from imperfections. Measure and mark the placement of the moulding on the wall.

Step - 2 ▶

Cut & Fit the Moulding

Measure and cut the moulding at a 45-degree angle. Dry-fit the moulding pieces together. Apply construction adhesive along the back of the moulding.

Step - 3 ▶

Install & Secure the Moulding

Position the moulding on the wall using the guidelines. Secure the moulding with adhesive or headless nails. Fill nail holes or gaps with wood filler or putty. Sand the filled areas for a smooth surface. Paint or finish the moulding.
